1st ISC International Conference on Cancer Therapeutics Molecular Targets, Pharmacology and Clinical Applications

February 19-21, 2004
Palazzo dei Congressi, Firenze, Italy

FIRST ANNOUNCEMENT

CONFERENCE GOALS

The 1st Conference on Cancer Therapeutics is the first of a series of meetings that will be organized by the International Society of Chemotherapy in the field of cancer chemotherapy.

The conference organizers are committed to assembling a programme featuring presentations from leading scientists working in the most topical fields of molecular targets and cancer therapeutics. The meeting is going to be an important appointment which will provide an occasion to present and discuss the most updated knowledge in these fields. Symposia, poster and poster discussion sessions are planned and there will be no parallel sessions.

We invite scientists and physicians to attend and present their most recent findings at this meeting.

We look forward to seeing you in Florence!

SCIENTIFIC PROGRAMME

MAIN TOPICS

Drug discovery technologies

Experimental/molecular therapeutics

- New cytotoxic agents
- Signal transduction modulators

Immunoactive agents (vaccines, biologicals, antibodies)

Gene therapy, antisense, ribozymes, small RNA interference

Drug resistance

Molecular and cellular pharmacology

Pharmacogenetics and pharmacogenomics

Pharmacokinetics and pharmacodynamics

Clinical pharmacology

Clinical trials

Drug treatment of solid tumours and haematological malignancies
